I need to split the following string into an array such that I get a list of new lines (' '). The string: nodename home 40.0.0.2 login@172.16.45.23 password radmin ^A#nodename home The result I need: nodename home 40.0.0.2 login@172.16.45.23 password radmin ^A nodename home The lines need to remain in their original order, from start to finish. A: Not sure if I understood what you were looking for, but it seems that you just want: var result = Regex.Matches(x.ToString(), @"^(.*?)(?=\.\|)").Select(m => m.Groups[1].Value).ToList(); A: You can use this regex.*nodename(.*)login(.*)password.* and in matcher function return the first group of the matched string. A: If you're using .NET 4.5, there is a much better way to do this - using regular expressions. Here's how I would do it: var pattern = new Regex(@"([\r]*)\s+(.*?)\s+([\r]+)(.*)", RegexOptions.Compiled); var matches = pattern.Matches(subject); var result = matches.Cast() .Select(m => m.Groups[1].Value) .ToList(); This gets us result as a list of the necessary values; the Regex used as the pattern of 50b96ab0b6
